01 SUMMARY

Full-stack developer specializing in the MERN stack, real-time systems, and AI-integrated products. Shipped 10+ production applications spanning multi-agent AI pipelines, WebGL/animation-rich interfaces, and scalable e-commerce platforms with secure payments and auth. Solved 500+ DSA problems; comfortable owning a feature from database schema to pixel-level UI polish.

02 TECHNICAL SKILLS

LANGUAGES	JavaScript, TypeScript, Java, C++, Python, SQL
FRONTEND	React, Next.js, HTML5, CSS3, Tailwind CSS, GSAP, Three.js, Framer Motion
BACKEND	Node.js, Express.js, Socket.io, REST APIs, Java (OOP, Full-Stack)
DATABASE & CLOUD	MongoDB, SQL, Firebase, Google Cloud Run, Git/GitHub
TOOLS	VS Code, Cursor, Figma, Postman, Render, Netlify, Vercel

03 PROJECTS

Phoenix — Crisis Recovery Agent 2026

React 19 · Node.js/Express · Google Gemini AI · Firebase · GCP Cloud Run

- Built a 6-agent AI pipeline (Google Gemini) that diagnoses project risk, triages features into keep/cut with confidence scores, and generates hour-by-hour rescue plans
- Designed a self-correcting simulation loop: Agent 4 models success/failure timelines and auto-retries triage at stricter cuts when simulated success odds fall below threshold
- Engineered multi-tier AI failover (dual Gemini keys → Groq → heuristic engine) with a circuit breaker and LRU response cache, ensuring zero blank-screen failures; deployed on Cloud Run with Firebase Firestore/Auth and Google Calendar sync

AURA — Luxury E-Commerce Platform 2026

React · Node.js · Express · MongoDB · Three.js · GSAP

- Built and deployed a production-grade e-commerce platform with a WebGL/Three.js hero using custom GLSL displacement shaders and GSAP ScrollTrigger animations across 10+ sections
- Implemented real-time cart state with Zustand, JWT auth with refresh-token rotation, Stripe payments, Cloudinary image uploads, and a complete checkout and order-management flow
- Architected a full REST API with role-based access control for secure, scalable backend operations

CodexSpace — Real-Time Collaborative IDE 2025

MERN · Socket.io · Google Gemini AI

- Built a real-time collaborative code editor with AI-assisted code generation, supporting 50+ concurrent users over WebSocket
- Integrated Google Gemini AI with rate limiting and retry logic for production-grade reliability, plus in-browser code execution via WebContainer

Inkwell — Animated Journaling Web App 2026

React · GSAP · Lenis · Canvas API · Tailwind CSS

- Built a premium animated journaling app with a custom SVG pencil cursor, real-time ink trail, and click-burst particle physics via the Canvas API
- Engineered a ghost-handwriting canvas, 3D tilt journal cards, and scroll-velocity-reactive marquees using Lenis smooth scroll and GSAP ScrollTrigger

04 CERTIFICATIONS

Wipro TalentNext Program Jul – Sep 2026

Java, OOP, Full-Stack Development (Java), SQL

Structured industry training covering core & advanced Java, OOP, full-stack Java development, and relational database management with SQL.

GenAI Powered Data Analytics 2025

Tata iQ · Forage

AI-powered data analytics simulation covering EDA, predictive modeling, and risk assessment; designed an AI-driven collections strategy incorporating ethical AI and regulatory compliance.

Front-End Software Engineering 2026

Skyscanner · Forage

Built a React travel-date-selection app using Skyscanner's Backpack component library; customized features and ran automated tests to verify rendering.

05 ACHIEVEMENTS

Tech & Media Lead Jun 2025 – Present

Public Policy and Governance Society (PPGS)

- Led digital strategy and technical operations across institute-wide events, managing content and tech initiatives end-to-end

06 EDUCATION

Haldia Institute of Technology 2023 – 2027

B.Tech, Electronics & Communications Engineering — Haldia, WB

Holy Cross School 2020 – 2022

Secondary Education (10th & 12th) — Bokaro Steel City, JH
