PROFESSIONAL SUMMARY

Full-stack developer specializing in MERN stack with expertise in animation-rich interfaces and scalable solutions. Deployed 10+ production projects focusing on real-time collaboration and AI integration. Strong foundation in DSA with 500+ problems solved.

EDUCATION

Haldia Institute of Technology <i>Bachelor of Technology in Electronics and Communications Engineering</i>	2023 – 2027 Haldia, West Bengal
Holy Cross School, Bokaro Steel City <i>Secondary Education (10th & 12th)</i>	2020 – 2022 Jharkhand

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, Python
Frontend: React, Next.js, HTML5, CSS3, Tailwind, GSAP, Three.js, Framer Motion
Backend: Node.js, Express.js, Socket.io, REST APIs
Database: MongoDB, Git/GitHub
Dev Tools: VSCode, Cursor, Figma, Postman, Render, Netlify, Vercel
Soft Skills: Problem Solving, Team Management, Communication, Research & Development

PROJECTS

Inkwell <i>React, GSAP, Lenis, Canvas API, Tailwind CSS, Vite</i>	Live Demo 2026
- Built a premium animated journaling web app featuring a custom SVG pencil cursor with real-time ink trail, chromatic aberration effect, and click-burst particle physics using Canvas API - Engineered ghost handwriting canvas with typewriter write/erase animation cycling through real diary entries, and 3D tilt-on-hover journal cards with specular gloss and ruled-paper texture - Implemented scroll-velocity-reactive marquee banners, word-by-word ink-sweep clip-path quote reveal, torn paper SVG transitions, and Lenis smooth scroll with GSAP ScrollTrigger throughout	
CodexSpace <i>MERN, Socket.io, Google Gemini AI</i>	Live Demo 2025
- Built real-time collaborative IDE with AI code generation, supporting 50+ concurrent users via WebSocket - Integrated Google Gemini AI with smart rate limiting and retry logic for production-grade reliability - Implemented WebContainer for in-browser code execution and fully responsive mobile-desktop UI	
SSS API Learning Hub <i>Vanilla JS, REST APIs, JSONPlaceholder</i>	Live Demo 2025
- Built interactive API learning platform with 50+ topics, hands-on exercises, and progressive quizzes - Created viva prep section with 100+ searchable questions and engaging particle animations	
Uber Clone <i>MERN Stack, Socket.io, Google Maps API</i>	GitHub 2025
- Building full-stack ride-sharing app with real-time location tracking and WebSocket-based updates - Integrating Google Maps API for route calculation, fare estimation, and interactive mapping	
Hyperspace Rush <i>Three.js, GSAP, WebGL</i>	Live Demo 2025
Built 3D tunnel racing game with procedural tracks, difficulty progression, and 60fps mobile controls	

CERTIFICATIONS

GenAI Powered Data Analytics <i>Tata iQ, Forage</i>	2025
- Completed AI-powered data analytics simulation with EDA, predictive modeling, and risk assessment - Designed AI-driven collections strategy incorporating ethical AI and regulatory compliance	
Front-End Software Engineering <i>Skyscanner, Forage</i>	2026
- Built React web application for travel date selection using Skyscanner's Backpack component library - Customized application features and ran automated tests to ensure proper rendering	

ACHIEVEMENTS

Tech & Media Lead	June 2025 – Present
Led digital strategy and technical operations for PPGS, managing content and tech initiatives across institute-wide events	
Problem Solving	
Solved 500+ data structures and algorithms problems
